Statement REACH/ RoHS

Dear Sir or Madam

STEINEL GmbH is certified according to ISO 9001 and ISO 14001. As part of our product development process, all materials and components are carefully selected and evaluated.

We hereby confirm compliance with the following regulations:

- RoHS – Directive 2011/65/EU, Directive 2015/863/EU
- REACH – Regulation No. 1907/2006

On 27.06.2018 a new SVHC list (substance of very high concern) was published on the basis of the European Union (EU) regulation on chemicals (REACH). As a result, lead was included in the candidate list as an SVHC substance. We have received notification from suppliers that some components may contain lead in a concentration of more than 0.1% by mass. Accordance with Art. 33 of the REACH Regulation (Regulation (EC) No. 1907/2006) we would like to inform you about this fact:

Material	CAS Number	EC Number	Application
Lead	7439-92-1	231-100-4	Copper alloys, aluminium components, in refractory solders, electrical and electronic components in glass or ceramic materials

The RoHS Directive 2011/65 / EU Annex III describes exceptions that allow certain limit values for lead concentrations above 0.1%. These specifications represent the maximum possible lead content in the individual components.

Yours faithfully
STEINEL GmbH

i.A. Dr. Michael Wallenhorst
